Making Tops For Your
Guppy Tanks
Stopping evaporation

Frank Schulterbrandt   11/24/2015

Making tops for you tanks can help you in at least three ways. Firstly your guppies can't jump out of the tank and end up into another tank ruining a whole tank of guppies. Secondly they can't jump out and end up on the floor. Last but not least your dehumidifier won't be going on and off all day by sucking the water from your tanks. When the dehumidifier is not on you are saving money.

1 x 3 Lumber

2 inch Duct Tape

3 inch corrugated Plastic

Cut to size the clear plastic sheet to fit over the whole wooden frame then staple to frame. Then using duct tape, tape the corrugated plastic to the wooden frame. The whole section should fit over 3 tanks. The plastic should be face down resting on the tanks. Some improvisation is need here. If there is a concern about using polyurethane, then use heavy duty Saran wrap (to wrap food with), which would be much cheaper.
